Thanks for the Thompson squib, the second copy of your article and the NYTimes Klan clipping.

I did not know you have any Rules transcript. I know there are several. I am interested in them only for historical purposes if you can sapre copies. Meaning a single copy of any transcript.

Please understand that I want this only for file purposes, that I could not begin to take time to read it now. This means please do not break your back. If you can do this, any time is fine. I can also return the copies after making copies for myself.

The same is true of the Slawson memo referred to in your article. In piecing it together there was an overlap. The extra piece is the reminder.

Slawsonk is, or was as of my last info, a law professor in L.A.

This would be a fine thing to read on a show you do out there.

When you send me an copy I'll make another and send it to a reporter friend out there who may, in time, find some way of using it.

Many tahnks,
